## EL PASO SCHOOL FOR GIRLS

HOME SCHOOL of highest standards, beautifully located in group of new buildings on commanding elevation. All departments in charge of experienced and capable instructors. The "house mother," a gentlewoman from the Eastern Shore of Maryland, gives personal care to girls in the home, and a graduate of the two most famous schools of physical culture in the United States directs the sports, gymnasium work, and physical development of the students. Intermediate,

Opens Thursday, September

high school, and college preparatory courses, thorough and well balanced to insure rounded development of mind, character, and body. Out of door recitations, evening classes in astronomy, lectures on topics of the day. Exceptional advantages in music, dramatic expression, physical culture, languages, mathematics, and domestic science. Ample accommodations for day pupils. In addition to the studies required for graduation, many elective courses are offered so that girls may follow out their own lines of spe-

cial work if they wish. Students may enter for special studies only. Very full English courses afford opportunity for advanced studies in literature, and advanced students also have the benefit of courses in the history of art, musical theory and composition, German literature, and higher mathematics. The El Paso School for Girls is chartered under the laws of Texas, and the board of directors and women's advisory board are made up of men and women recognized as among the leaders in El Paso's intellectual, business, and social life. For further information, year book, and registration blanks address EL PASO SCHOOL FOR GIRLS, EL PASO, TEXAS.

#### LETTERS To the HERALD

(All communications must bear the signature of the writer, but the name ria, smallpox and yellow fever. If we will not be published where such a re-

quest is made). EVILS TO BE GOT RID OF, NOT FOSTERED." El Paso, Texas, Sept. 2.

Editor El Paso Herald:-Judging from a report in The Her-ald of Thursday, it becomes very apparent that the stockyard interests are not asleep and intend to "dump down" on the south side of the city, if permitted, not only greater stockyards, but abattoirs, slaughter houses, etc., with all their attendant horrors and disease breeding plagues. The promoters go still farther and make application for an additional five acres more to be devoted to polluting the atmosphere

and destroying the health and lives of poor people of this city who, unfortunately, have to reside in that section.

A short time ago Dr. W. A. Anderson, our city physician, with his force, made a house to house survey of this deplorable locality and found, and so reported to the proper authorities, many hundreds of houses unsanitary and many uninhabitable, and recommended, solely as a sanitary measure, that numbers of and possessed of the usual pre-for which messenger boys the sanitation, even going so far as to give to the office of the Adams Annex and ately destroyed and who their owners Some of the owners, to their credit be it said, acquiesced in this movement, and all others have been

summoned to appear. But is this the only nuisance to be abated? The people of this city are now pretty well informed how all of these disofficer to hear himself addressed as ty of an otherwise very healthy and a "Frank" by an unimpressionable young small normal death rate, as a whole, of, They certainly will stand supinely by and see this outrage thrust on them, which, if allowed, will take years to put out the same as citizens of other western cities are now trying to do and have been for years. See how strange this is. Here are hundreds of "homes" unsanitary, and

wholesale destruction of the same is suggested to relieve the sufferings and the abnormal death rate of a section of this city so as to better the conditions, and in the face of this, with what might be stigmatized as gall personifled, it is sought to introduce other slaughter houses, stockvards, etc., these scientists and physicians the originaalthough he is not threatened from ewn divine right absolutely to rule his catch a glimpse of the emperor as he the ills now complained of by thousands any source. ### "RACK TO NATURE."

By Mile Hastings,

66 DACK to nature" means back to drinking polluted waters and sleeping aches and pains and festering wounds and a death rate to counteract which goose's anatomy u every woman must bear a child a year. fatty degeneration. If we should go back to nature a man's existence would only be an affair

"Back to nature" is an error, a fallacy, a superstition; its most enthusiastic disciple would flee from the full reality as from a pestilence. No one really wants to go back to nature. The cry has simply been raised by short-sighted people who have become frightened at the evident evil of a few of man's erously chosen habits and the morbid developments of congested wealth.

of food and fighting, and woman's life

a matter of food and flight and child-

What we do want is not that which is "natural," but that which is best for man; and the two terms are far from It is wholly natural for a man to go with head uncumbered and uncombed.

of either the wild man of Bornes or the

tame fop of Broadway. Man's natural diet consisted of occasional nuts and seeds-fruits, green, ripe or rotten, according to the season mosquitoes and flies and ver-min; it means back to mala-could get his hands on. It was a rumria, smallpox and yellow fever. If we my bill of fare, but it was just as go far enough back, it means back to wholesome and less expensive than nudity, which is neither comfortable pate de foie gras, a civilized dish made nor beautiful; to crudity of diet, to out of the livers of geese which have out of the livers of geese which have been shut up in the dark and had nocin caves. It means theumatism and dies poked down their throats until that overburdened excretory organ of the goose's anatomy undergoes a sort of

"Back to nature" faddists and slaves of modern fashion are in reality very much alike. They are both blind followers of the blind. The one follows the fashions of today; the other the fashions of ten thousand years agoneither seek after the optimum conditions of life, for they are both filled with the notion that the environments of life are readytower, and made either in Paris er in the Piji Islands.

The spirit of the same and scientific fast to that which is good." And by this spirit shall we continue to climb away from the wild chaos where beasts and bacteria and primitive man once struggled in misery together, and go forward from nature.
